

The best European experimental theatre
(School of Grotowski)
Scena Plastyczna KUL
"Moisture"

Leszek Madzik (creator of the Scena Plastyczna KUL) for a long time has had a deep passion for the theatre with no words. He believes in the form of communication, where words are only a mutilating device that destroys the pure meaning of the message. Critics describe "Moisture" as:

"It can be called neither theatre nor spectacle... Water is the most significant element... Live emerges from water. Water makes it last..."

R. Zahnd – Gazette de Lusanne, 1984

"Looking at these phenomenal images and taking part in these extraordinary spectacles, we experience mortality as intensively as we do precisely because we know that this theatre lives just as long as we live."

Andrzej Wajda (Oscar winning Polish film director)
